

Welcome to the

Center for Integrative & Regenerative Medicine

Restore, optimize, and maintain your health, well-being, and youthful vitality and appearance with cutting edge, effective, advanced scientific, precision medical therapies:

Integrative Family Medicine, including the following diagnostic tools & therapies:

Chelation Therapy – for removing toxic heavy metals, and helping to overcome your health problems due to excessive, free radical oxidative stress.

Constitutional Homeopathy – deep-acting, safe, cost-effective, bio-energetic medicine for helping to regain and maintain the optimum, overall health of your mind and body.

Detoxification Programs – for helping to restore healthy function of your digestive and immune systems by removing and protecting against internal and environmental toxins.

Epigenetic Health Coaching & Nutrigenomics – precision genetic medicine involving the science and clinical application of genomic interpretation with effective, professional guidance for individualized, nutritional therapy and exercise founded upon your unique, inherited, genetic cellular biochemistry that helps to optimize your total metabolic health and human potential.

Intravenous Nutritional & Bio-oxidative Therapies – for supporting your vital organ systems, and immune system defenses to effectively fight acute and chronic infections of all kinds.

PEMF – Pulsed Electromagnetic Field therapy to effectively help resolve acute and chronic pain, significantly improve circulation, and revitalize your total body cellular energy and aliveness.

Prolozone – an advanced, homeopathic/oxygen-ozone injection therapy that is excellent for all forms of musculoskeletal and joint pain.

Regenerative Cell Therapy – unique injection therapy for helping to powerfully regenerate and rejuvenate your entire body and mind.

Thermography – safe, cost-effective, early detection and evaluation of acute and chronic pain, inflammation, and potential abnormalities in your body, without exposure to any radiation or trauma.
